RESPONSE

John Tory has a deep and abiding commitment to the quality of Ontario's air shed.

Ontario needs a comprehensive energy plan that recognizes our need for reliable sources of energy while protecting our air quality. Dependence on U.S. sources for our energy needs and a failure to reduce emissions from existing Ontario-based power plants has helped to contribute to pollution throughout Ontario.

John Tory is determined to achieve cleaner air and bring about a dramatic reduction in harmful emissions as quickly as possible. All options will be considered and analyzed and the analysis will be made public.

John Tory will insist that we immediately explore new technologies that could significantly reduce emissions.
