Ontario Clean Air Alliance

October 2007 Provincial Election Questionnaire

Question: Do you support Hydro One's proposal to build a new $635 million high-voltage electricity transmission line from the Bruce Nuclear Station to the Town of Milton?

Answer: (Please circle one)

a) Yes
b) (No)
c) Undecided

Additional Comments

I believe that through increased efficiency and conservation, we can avoid the need for new transmission corridors in Ontario. The Green Party is committed to a fifteen year, $16 billion investment in electricity conservation and efficiency measures. This will create the conditions that would allow Ontario to return to 100% renewable energy by the year 2025 and to phase out coal power production in Ontario by late 2009.

Has the OCAA looked into the new transmission lines that are more efficient and could prevent new builds? If there is someone in your organization who would like more information, please contact me.
