

IMPORTANT PUBLIC SAFETY ANNOUNCEMENT

KI anti-radiation pills now available to all residents living within 50 kilometres of the Pickering Nuclear Plant

You need to act today if you live in the 50 km zone, which includes the entire City of Toronto!

KI (potassium iodide) tablets can help to prevent thyroid cancer. But to be effective, **KI must be taken before or shortly after exposure to radiation.**

Ontario Power Generation is now supplying KI pills on request to all residents living within 50 km of the Pickering Nuclear Plant. Having an adequate supply of KI in your home, school or workplace is an important safety measure in case of a major accident at the Pickering Nuclear Station.

Order your KI pills today!

50 km zone.
KI pills should be ordered if you live in this zone.
