Niagara West-Glanbrook Provincial By-Election Questionnaire

Question #1: Do you support Ontario Power Generation's proposal to raise the price of its nuclear electricity by 180% to pay for the continued operation of its money-losing Pickering Nuclear Station and to re-build the Darlington Nuclear Station?

Answer: Yes _____ No _____ Undecided _____

Additional Comments:

It is essential that we, as a province, invest in crucial energy infrastructure to ensure clean, reliable, and affordable power for our province's consumers for years to come. Nuclear energy is, and will continue to be, one of Ontario's most affordable sources of electricity. Over the 30 year lifespan of the Darlington contract the cost per kwh is expected to be roughly 8 cents. You can count on the Ontario PC Party to continue to stand up for energy generation that is both affordable and reliable, while providing good paying jobs to families across this province.

Question #2: Do you believe that the Pickering Nuclear Station should be closed in 2018 when its licence expires?

Answer: Yes _____ No _____ Undecided _____

Additional Comments:

Ontario, in the midst of an energy crisis, cannot afford to turn its back on nuclear energy, which has proven to be a safe, reliable, and affordable source of energy. Under the Wynne Liberals, Ontario is home to some of the highest and fastest increasing electricity prices in North America. Since the Liberal Government first took office, the average household has seen their annual electricity costs increase by more than \$1,000 a year.

Question #3: Should the Government of Ontario seek to negotiate a long-term electricity supply contract for Quebec water power which will allow us to cancel the Darlington Re-Build Project and lower our electricity rates?

Answer: Yes_____ No_____ Undecided

Additional Comments:

The Ontario PC Party is open to any option that makes electricity more affordable for Ontario families, seniors, and businesses. If the Government were serious about tackling the crisis of skyrocketing electricity prices in the province of Ontario they would immediately do the following; stop the fire sale of Hydro One, stop exporting power at a loss, stop signing energy contracts for power that we don't need, and restore the municipal planning powers that were stripped away by the Liberals and the NDP.
