Promise.**

**Cut My
Hydro
Bill!**

**Premier Ford, lower our
hydro bills by 12% by making
a deal for low-cost water
power from Quebec.**

Sign the Petition:

CutMyBill.ca

Premier Ford has pledged to cut our hydro bills by 12%. Here is how he can do it.

Buy low-cost water power from our neighbours in Quebec.

**Power at
Less Than $\frac{1}{3}$ the
Cost**

Quebec has a huge power surplus and is eager to sell more electricity to Ontario. In fact, it has offered to sell us lots of electricity at **less than one-third the price of re-building the aging Darlington Nuclear Station. **The difference is billions of dollars.****

Ontario Power Generation says it will need to **double its price of nuclear electricity** to pay for the Darlington Re-Build. Fast-rising nuclear power costs mean **higher bills for all power users in Ontario.**

If we make a deal with Quebec, we can lower our electricity prices instead of seeing our power bills go through the roof.
