

Electricity Consumer Protection Pledge

I pledge to protect Ontario electricity consumers from rising hydro bills caused by out-of-control nuclear project spending by preventing nuclear companies from passing their cost overruns onto consumers and taxpayers.

Ask your candidates if they will prevent another costly nuclear bailout

Every nuclear project in Ontario's history has gone massively over budget, leaving this province's taxpayers and consumers paying off a \$19 billion debt. Don't let it happen again! Wind, solar, biomass, hydro and gas generators are not allowed to pass their cost overruns onto consumers. Why should nuclear companies get special treatment? It is time to level the playing field for these cleaner and safer electricity sources.

When election candidates come to your door, ask them to sign this Pledge. If they do, please send the pledge to the Ontario Clean Air Alliance so that we can keep track of all the candidates who will stand up for taxpayers and ratepayers and oppose more nuclear bailouts.
