

Ontario's Growing Climate Crisis

Gas Plant Pollution to increase by more than 300%

It's time to protect our climate and our pocketbooks by phasing-out Ontario's gas-fired power plants and moving our province toward a 100% renewable electricity future.

ONTARIO
CLEAN AIR
ALLIANCE

Doug Ford wants to ramp up the greenhouse gas pollution from Ontario's gas-fired power plants by **more than 300%** by 2025.

To help fuel this massive increase in fossil fuel electricity and **climate damaging pollution**, Enbridge wants to import **fracked gas** from Pennsylvania by building a **large pipeline** through Hamilton – a pipeline that would raise our gas rates by **\$120 million**.

If Doug Ford, Enbridge and Ontario Power Generation (OPG) get their way, Ontario will not be able to meet its 2030 climate target. We can't let this happen!

Fortunately, we don't need to import fracked gas from Pennsylvania to keep our lights on. **We can lower our electricity bills and our climate impact by importing clean water power from Quebec and by investing in energy efficiency and Made-in-Ontario renewable energy.**

OPG's Gas Plants

Tell Doug Ford to protect our climate by phasing-out Ontario's gas-fired power plants.
