RE: Ontario Clean Air Alliance 2022 Provincial Election Questionnaire

Question #1

If elected, will you create a net-zero carbon electricity grid for Ontario by 2030?

Answer: Yes X No Undecided

Additional Comments:

The Ontario Greens plan to eliminate fossil fuels from electricity generation the fastest way compatible with our fair share carbon budget, aiming to phase out fossil gas by 2030. We plan to double Ontario's electricity supply with renewables (including green hydrogen) by 2040, and make Ontario's electricity emission-free as quickly as possible.

Question #2

If elected, will you implement a moratorium on the building of a new nuclear reactor in the GTA until we have a permanent safe storage facility for nuclear waste?

Answer: Yes ___ X ___ No _____ Undecided _____

Additional Comments:

The Ontario Greens do not support building any new nuclear reactors.

PO Box 1132 Station F
Toronto, ON M4Y 2T8

Question #3

If elected, will you order OPG to immediately dismantle the Pickering Nuclear Station after it is shut down?

Answer: Yes No Undecided

Additional Comments:

The Ontario Greens would immediately start to decommission and deconstruct the Pickering Nuclear Station. Decommissioning and dismantling it could create approximately 32,000 person-years of direct and indirect employment.
